Studying in Istanbul

Istanbul has a wonderful location spanning the European and Asian continents across the Bosphorus Straits. Throughout history, this unique location made Istanbul politically, commercially and culturally a very important city. Once the capital of the Byzantine and Ottoman empires, Istanbul has great historic monuments, a commercial culture that is still very much alive and a cosmopolitan culture that welcomes all. Istanbul is also an education hub with 58 universities currently operating and hosting 600,000 international students. Living and studying in Istanbul is a great experience with so many places to see and so many things to do. As Napoleon said, "if the whole world were one country, Istanbul would be its capital".

About IAU

Students' Top Choice IAU is the most preferred Foundation University in Turkey both by Turkish students and international students.

Focus on Competency IAU emphasizes professional competency in its teaching. Students have internships integrated into their curricula and applied training opportunities through the many industry partnerships of IAU.

Technological Campus IAU has engineering and health sciences laboratories equipped with the latest technology, as well as art and design workshops and studios. Every classroom is equipped with smart boards and podiums.

International University IAU has an international campus with more than 3,750 international students from 102 countries. IAU also offers numerous study abroad opportunities to all its students with its foreign partner universities.

Comprehensive University IAU offers academic programs in Associate's, Bachelor's, Master's and Doctoral levels.

City University IAU's main campus in Florya offers easy access to the many social and cultural activities in Istanbul through public transportation.

IAU International Istanbul Aydin University is committed to internationalization of its student body and academic programs. IAU Directorate of International Relations is responsible for managing and developing international activities. Various offices under the directorate run the student exchange programs such as Erasmus+ and Mevlana, study abroad programs, international summer and winter programs, full-time student recruitment activities, international student support services and Turkish language courses for international students.

RESEARCH CENTER

Africa Research and Application Center (AFRIKAM)

Our Center aims to increase Turkish researchers' attention towards Africa's social, economic and political structure; to help prepare reports and projects about the continent; to assess the relation between Turkey and Africa on cultural, historical, religion, political and economic level; to help identify the roles Turkey can take in Africa's future and global economy.

Application and Research Center for Advanced Studies

Our Center is established with the aim to review advanced and contemporary developments in science and technology, to conduct scientific researches within the framework of national and international collaborations, to increase the quality and the productivity of such researches, to collaborate with other national and international application and research centers in related fields and to contribute to the development of educational programs in related fields.

Disaster Training Research and Application Center (AFAM)

The scope of AFAM's work is to create knowledge by encouraging and coordinating interdisciplinary research activities in the field of local and foreign disaster management with the collaboration of relevant academic units of the university; to disseminate the knowledge created and the ideal applications via different sources of communication.

Environment and Human Health Research and Application Center

The Center's aim is to review scientific and technological advances in regards to environment and human health; to conduct scientific researches within the framework of international scientific collaboration; to increase the quality and productivity of the researches; to collaborate with local and foreign research centers in the same field and to contribute the development of masters programs in related fields.

Middle East and Caucasus Studies Research and Application Center

The Center aims to conduct joint projects in science, sociology, culture, arts and sports fields in Azerbaijan and the countries in the region with the condition to increase the solidarity of national unity.

Turkish Studies Research and Application Center (TAM)

The Center is established to analyze and review Turkey's political, economic, legal, social and cultural issues through science, to conduct research and applications with an interdisciplinary approach and to create knowledge.

Social Studies Application and Research Center (TARMER)

The Center aims to conduct academic studies and researches and publications in order to review the cultural structure of the society we live in, based on scientific data, to determine the interaction of cultures, the role of factors such as beliefs, languages, and race in this formation, to reveal the effects of philosophical, ideological, scientific, technological developments.

Vocational Test Center

Vocational Test Center of Istanbul Aydin University (IAUMSM) has been founded to evaluate and certificate the personnel who has been working or would like to work in the fields of construction and informatics in terms of vocational knowledge and qualifications based on the norms of national standards and competence.

Energy Policies and Markets Applied Research Center (EPPAM)

EPPAM aims to contribute energy policy making and development process in Turkey through conducting researches and following developments and researches on energy policies and markets.

Career Development Research and Application Center

Our Center aims to contribute to develop our university and country's human resources potential and performance and to increase the reputation and preferability of our university and its members by enhancing career planning and development skills of prospective students, current students, alumni and employees in line with the needs and the conditions of our University and our country.

Distance Learning Research and Application Center

Considering the need, Istanbul Aydin University has established distance learning system for associate's and bachelor's degrees. The Center has one MA program in E-business, and two BA programs in Computer Programming and Occupational Health and Safety.

Education Sciences and Technologies Application and Research Center (EBTAM)

EBTAM is established to assess and evaluate international education and education technologies, to conduct high quality research and development studies, and to develop data based education policies and strategies.

Science, Technology, and Math Training, Application and Research Center

The Center is established to see the effects of educational policies, to change the education system into a more functional one, and to increase the quality of education.

Occidental Studies Research and Application Center

OSARC organizes a rich interdisciplinary conferences, panel, lectures, special events and supports and presents advanced research on the Occidental history, society, culture, religion and politics. OSARC also shares academic expertise with the wider public, business, media and government institutions.

Ataturk's Principles and the History of the Revolution Research and Application Center

The Center aims to carry out works on Ataturk's principles, the meanings and aims of those principles and the contributions of Turkish state to humanity in the past in order to raise Turkish youth as individuals who are well aware of national, spiritual and cultural values; believe in indivisible unity of Turkish State as a nation; understand and internalize Ataturk's ideas, principles and revolutions and strive to contribute to the state and the nation with the strength they obtain from his ideas, principles and revolutions.

Health Research and Application Center

The Center is established to conduct and deliver research to offer diagnosis and treatment techniques for public health that offer quality and modern diagnosis and treatment services in line with today's needs and meet expectations and respect patients' rights.

Space Sciences Application and Research Center

The foundation of the center was completed in 26th of February. Istanbul Aydin University Observatory has been went into action its first activities within The Center and the first light was taken by 27th of November, 2015.

Child Education Research and Application Center

Our Center is established for elementary, middle school and high school students to obtain reliable and up-to-date information in the fields of science of their interest from scientists who are experts in their fields; to have access to scientific information easily; to conduct workshops to bring up the areas of their interest and they are talented at to make informed decision in choosing their career; to inform the families of the students in need of special education and to include students when they are young in projects to train young scientists well equipped.

Oral and Dental Health Research and Application Center (ADSM)

Istanbul Aydin University Faculty of Dentistry Oral and Dental Health Research and Application Center aims to provide quality service to community at the diagnostic and treatment centers opened in Bahcelievler and Florya, Istanbul. It also aims to train young people to have the qualifications to be able to compete with dentists around the globe and to train students who are well equipped in theoretical and practical fields, able to speak a foreign language and capable of working anywhere in the world.

Turkish Language Teaching Application and Research Center (Aydin TOMER)

TOMER is a center established to teach foreign students to learn Turkish in a modern teaching environment with modern teaching techniques. Established within our university, the Center formed its curriculum in line with Europe Common Language Criteria. Our experienced teaching staff at our Center have a student-centered approach.

China Study Center

Istanbul Aydin University China Study Center is the very first research center specifically focusing on China based at a university in Turkey. It is established in February 2016 and it aims to promote knowledge and understanding of China's economy, politics, international relations, and culture. The center carries out research and engages in activities such as seminars, lectures, collaborative research, conferences, academic and student exchanges, summer schools.

Higher Education Studies Research and Application Center

Our aim is to conduct research towards increasing the quality of education and training in higher education, to review valid and up-to-date quality standards in higher education; to assess performance criteria and to work towards developing standards and criteria that match our country's needs; evaluation of the necessary conditions for R&D studies in higher education and to create applicable models; review the effects of Bologna Process and Accreditation on higher education and to conduct research in this regard.
